Components that i like which can be a part of the UI

1.Slide transition

```
function SlideEx() {
const { isOpen, onToggle } = useDisclosure()

return (
  <>
    <Button onClick={onToggle}>Click Me</Button>
    <Slide direction='bottom' in={isOpen} style={{ zIndex: 10 }}>
      <Box
        p='40px'
        color='white'
        mt='4'
        bg='teal.500'
        rounded='md'
        shadow='md'
```

```
>  
  <Lorem count={2} />  
  </Box>  
</Slide>  
</>  
)  
}
```

2.Alert Dialog-overlay

3.skeleton

4.toast-for success message
